**Subject:** NuFact07 ...

Dear All,

Vittorio has been negotiating with the organizers of NuFact07 to define the IDS contributions to the work shop. On the first day, we have 1.5 hours of plenary talks. The present draft of the agenda follows:

<b>August 6 (Mon)</b>			
16:30-18:30 P4: NuFact07 Organization			
P4-1	IDS/ISS Physics	25+5"	
P4-2	IDS/ISS Detector	25+5"	
P4-3	IDS/ISS Accelerator	25+5"	

One last day, there is a closing session with the following draft agenda:

<b>August 11(Sat)</b>			
8:30-12:30 P11-12: Summary			
P12-2	IDS	35+5"	

The present proposal to the NuFact07 organizers is that the talks in P4 will form the basis of a discussion of the proposed NF IDS and that the final session will provoke a discussion of the overall strategy by which the community seeks to arrive at 2012 with costed super-beam, beta-beam, and Neutrino Factory options as input to a possible approval/decision process.

We need to propose a talks for session P4.

The goal of P4 should be to present the plans we are laying for the NF IDS and to generate discussion amongst the delegates at NuFact. I believe we should structure the session to present the NF IDS 'vision', and the ideas in the three areas listed by the organizers. Since we need to allow time for discussion, I think we should propose slightly shorter talks to make some room. So, I would like to propose:

- |   |         |
|---|---------|
| Intro/overview: (what we've done, overall plan) | 10 mins |
| Physics   | 20 mins |
| Accelerator                                     | 20 mins |
| Detector  | 20 mins |

Discussion

20 mins

The session chair would, of course, chair the discussion.

Please react to the proposal and suggest speakers. At our next phone meeting (06Jul07, 13:30) we should try and arrive at a definite proposal.

K

PS notes on our last phone call to follow!
